10	Image reader has center of gravity movement reduction unit that performs the reduction control of the center of gravity of movement, based on the frequency of accumulation scan		
11	Image reader updates control value of fluorescent lamp based on amount of light emission and controls light emission of lamp based on determined control value		
12	Image reader sets control value based on lighting time measured at the time of image reading for the first time		
13	Image reader for original document reading has reduction unit to reduce quantity of light per scan during reading along subscanning direction for various colors depending on their afterglow characteristics		
14	Image reading apparatus
